

Please Join Us for a Non-CME Industry Satellite Symposium (ISS06),
Supported by Bristol Myers Squibb, During the 38th ECNP Congress

FROM HYPOTHESIS TO INNOVATION

Cholinergic Mechanisms in Neuropsychiatric Disease Pathology

This session will explore the neuropsychiatric symptoms of schizophrenia and Alzheimer's disease, with a focus on the role of cholinergic signaling in disease pathophysiology and treatment, including emerging therapies targeting cholinergic mechanisms, highlighting unmet needs, caregiver burden, and future directions in neuropsychiatric care.

Sunday, 12 October 2025 | 8:40-10:00 AM CEST

RAI Amsterdam | Hall 2 - Vermeer

Prakash Masand, MD, CHAIR

Adjunct Professor, Academic Medicine Education Institute
Duke-NUS Medical School
Singapore

Charlotte Teunissen, PhD

Professor in Neurochemistry
Head, Neurochemistry Laboratory
Department of Laboratory Medicine
Amsterdam University Medical Center
Vrije Universiteit Amsterdam, The Netherlands

Speakers are paid consultants of Bristol Myers Squibb

Please visit the exhibition stand of BMS (#3.209) for more information.
