

# 37<sup>th</sup> ECNP Congress

Welcome to the future  
of CNS treatments

21-24 September 2024

Milan, Italy

## Which scientific topics are accepted at the ECNP Congress?

ECNP's mission is to ensure that advances in the understanding of brain function and human behaviour are translated into better treatments and enhanced public health. ECNP accepts and encourages the submission of abstracts by psychiatrists, neuroscientists, neurologists, psychologists and other professionals, from across the world, who are keen on discussing the latest developments in the science and treatment of brain disorders. ECNP accepts abstracts from a broad range of topics in applied neuroscience. A list of the most common topics, divided over four overarching tracks, is here. This list has been fully revised in January 2024. Contact [congress2024@ecnp.eu](mailto:congress2024@ecnp.eu) for questions.

Track	Topic
Mental conditions	Addiction
	Anxiety and anxiety disorders
	Eating disorders
	Impulsive and compulsive disorders
	Mood disorders
	Personality disorders
	Psychotic disorders
	Sleep disorders
Trauma and stress-related disorders	
Transdiagnostic	Biomarkers
	Brain-immune interactions
	Gender health
	Gut-brain axis
	Neurodegenerative disorders and dementia
	Neurodevelopmental conditions
	Neurological disorders
	Neuroscience culture and society
	Perinatal health
	Pharmacogenomics
	Precision medicine
Interventions	Digital Health
	Gene and stem cell therapy
	Neurostimulation and related techniques
	Pharmacological interventions
	Prevention and lifestyle
	Psychedelics
	Psychotherapy
Research methods and technologies	Animal models
	Artificial Intelligence and computational models
	Cellular and molecular approaches
	Epidemiology
	Neuroimaging
	Neurophysiology and electrophysiology
	Neuropsychology
	New tools in neuroscience applied
	Pharmacology
	Psychiatric genomics
Systems and circuits neuroscience
