

Damiaan Denys

**Psychiatry department, University Medical Centre, Amsterdam Medical Centre
The Netherlands**

The Psychiatry department at the Amsterdam UMC, location AMC, has a very broad orientation. Our main focus is to treat and investigate patients with various psychiatric disorders. A wide variety of patients are diagnosed and treated, in example patients diagnosed with schizophrenia, depression, obsessive compulsive disorder, misophonia, phobias or fear complaints. At our department, a diverse spectrum of research techniques is applied, for example questionnaires, interviews and imaging.
