

Eduard Vieta is Professor of Psychiatry, Head of the Department, and the Director of the Bipolar Disorders Program of the Hospital Clinic at the University of Barcelona in Catalonia, Spain. He is the current Director of the Bipolar Research Program at the Spanish Research Network on Mental Diseases (CIBERSAM), funded by the Spanish Ministry of Science and Innovation. His research focuses on the neurobiology, epidemiology, and treatment of bipolar disorder.

In 2005, Professor Vieta received the Aristotle award and, in 2007, the Mogens Schou award, and in 2012 the Colvin Price on Outstanding Achievement in Mood Disorders Research by the Brain and Behaviour Research Foundation. He has made significant contributions to many of the published bipolar disorder treatment guidelines and has authored more than 450 original articles, 200 book chapters and 27 complete books. His H index is 57 and has over 12000 citations. Furthermore, he is on the editorial board of a range of international scientific journals. He has served as invited professor at Harvard University and as neuroscience scientific advisor to the European Presidency.
